

Byfleet Primary School - Geography Skills Progression

By the end of Key Stage 1, pupils should develop knowledge about the world, the United Kingdom and their locality. They should understand basic subject-specific vocabulary relating to human and physical geography and begin to use geographical skills, including first-hand observation, to enhance their locational awareness.

Pupils should be taught to:

Locational knowledge	<ul style="list-style-type: none">● name and locate the world's seven continents and five oceans● name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas
Place knowledge	<ul style="list-style-type: none">● understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country
Human and physical geography	<ul style="list-style-type: none">● identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles● use basic geographical vocabulary to refer to:<ul style="list-style-type: none">○ key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather○ key human features, including: city, town, village, factory, farm, house, office, port, harbour and shop
Geographical skills and fieldwork	<ul style="list-style-type: none">● use world maps, atlases and globes to identify the United Kingdom and its countries, as well as the countries, continents and oceans studied at this key stage● use simple compass directions (North, South, East and West) and locational and directional language [for example, near and far; left and right], to describe the location of features and routes on a map● use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features; devise a simple map; and use and construct basic symbols in a key● use simple fieldwork and observational skills to study the geography of their school and its grounds and the key human and physical features of its surrounding environment.

By the end of Key Stage 2, pupils should extend their knowledge and understanding beyond the local area to include the United Kingdom and Europe, North and South America. This will include the location and characteristics of a range of the world's most significant human and physical features. They should develop their use of geographical knowledge, understanding and skills to enhance their locational and place knowledge.

Byfleet Primary School - Geography Skills Progression

Pupils should be taught to:

Locational knowledge	<ul style="list-style-type: none"> ● locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities ● name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time ● identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night)
Place knowledge	<ul style="list-style-type: none"> ● understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region within North or South America
Human and physical geography	<ul style="list-style-type: none"> ● describe and understand key aspects of: <ul style="list-style-type: none"> ○ physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle ○ human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water
Geographical skills and fieldwork	<ul style="list-style-type: none"> ● use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied ● use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world ● use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.

Aspect	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Human features and landmarks	Name and describe the purpose of human features and landmarks.	Use geographical vocabulary to describe how and why people use a range of human features.	Describe the type and purpose of different buildings, monuments, services and land, and identify reasons for their location.	Describe a range of human features and their location and explain how they are interconnected. Human features can be interconnected by function, type and transport links.	Describe and explain the location and purpose of transport networks across the UK and other parts of the world.	Explain how humans function in the place they live.

Byfleet Primary School - Geography Skills Progression

Settlements and land use	Identify the characteristics of a settlement.	Describe the size, location and function of a local industry.	Describe the type and characteristics of settlement or land use in an area or region.	Explain ways that settlements, land use or water systems are used in different parts of the world.	Describe in detail the different types of agricultural land use in the UK. Agricultural land use in the UK can be divided into three main types, arable (growing crops), pastoral (livestock) and mixed (arable and pastoral).	Describe the distribution of natural resources in an area or country. Natural resources include food, minerals (aluminium, sandstone and oil) energy sources (water, coal and gas) and water.
Climate and weather	Identify patterns in daily and seasonal weather.	Describe simple weather patterns of hot and cold places.	Explain how the weather affects the use of urban and rural environments.	Explain climatic variations of a country or continent.	Explain how the climate affects land use.	Evaluate the extent to which climate and extreme weather affect how people live.
Physical processes	Describe in simple terms how a physical process has affected an area, place or human activity.	Describe, in simple terms, the effects of erosion.	Explain the physical processes that cause earthquakes and volcanic eruptions.	Use specific geographical vocabulary and diagrams to explain the water cycle.	Describe how soil fertility, drainage and climate affect agricultural land use.	Describe the physical processes, including weather, that affect two different locations.
Geographical resources	Identify features and landmarks on an aerial photograph or plan perspective.	Study aerial photographs to describe the features and characteristics of an area of land.	Analyse maps, atlases and globes, including digital mapping, to locate countries and describe features studied.	Study and draw conclusions about places and geographical features using a range of geographical resources, including maps, atlases, globes and digital mapping.	Analyse and compare a place, or places, using aerial photographs, atlases and maps.	Use satellite imaging and maps of different scales to find out geographical information about a place.
Data analysis	Collect simple data during fieldwork activities.	Collect and organise simple data in charts and tables from primary sources (fieldwork and observation) and secondary sources (maps and books).	Analyse primary data, identifying any patterns observed.	Collect and analyse primary and secondary data, identifying and analysing patterns and suggesting reasons for them.	Summarise geographical data to draw conclusions.	Analyse and present increasingly complex data, comparing data from different sources and suggesting why data may vary.

Byfleet Primary School - Geography Skills Progression

Fieldwork	Carry out fieldwork tasks to identify characteristics of the school grounds or locality.	Ask and answer simple geographical questions through observation or simple data collection during fieldwork activities.	Gather evidence to answer a geographical question or enquiry.	Investigate a geographical hypothesis using a range of fieldwork techniques.	Construct or carry out a geographical enquiry by gathering and analysing a range of sources.	Ask and answer geographical questions and hypotheses using a range of fieldwork and research techniques.
Natural and man-made materials	Identify natural and man-made materials in the environment.	Describe the properties of natural and man-made materials and where they are found in the environment.	Name and describe the types, appearance and properties of rocks.	Describe and explain the transportation of materials by rivers. Describe the properties of different types of soil.	Explain how the topography and soil type affect the location of different agricultural regions.	Explain how the presence of ice makes the polar oceans different to other oceans on Earth.
Physical features	Use basic geographical vocabulary to identify and describe physical features, such as beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley and vegetation.	Describe the size, location and position of a physical feature, such as beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley and vegetation.	Describe the parts of a volcano or earthquake. Name and describe properties of the Earth's four layers.	Identify, describe and explain the formation of different mountain types.	Identify and describe some key physical features and environmental regions of North and South America and explain how these, along with the climate zones and soil types, can affect land use.	Compare and describe physical features of polar landscapes.
Environment	Describe how pollution and litter affect the local environment and school grounds.	Describe ways to improve the local environment.	Identify the five major climate zones on Earth.	Describe altitudinal zonation on mountains.	Name and locate the world's biomes, climate zones and vegetation belts and explain their common characteristics.	Explain how climate change affects climate zones and biomes across the world.
World	Name and locate the world's seven continents and five oceans on a world map.	Name and locate seas surrounding the UK, as well as seas, the five oceans and seven continents around the world on a world map or globe.	Locate countries and major cities in Europe (including Russia) on a world map.	Locate the countries and major cities of North, Central and South America on a world map, atlas or globe.	Name, locate and describe major world cities.	Explain interconnections between two areas of the world.

Byfleet Primary School - Geography Skills Progression

UK	Name and locate the four countries of the UK and their capital cities on a map, atlas or globe.	Identify characteristics of the four countries and major cities of the UK.	Name, locate and describe some major counties and cities in the UK.	Create a detailed study of geographical features including hills, mountains, coasts and rivers of the UK. Identify the topography of an area of the UK using contour lines on a map.	Describe the relative location of cities, counties or geographical features in the UK in relation to other places or geographical features.	Describe patterns of human population growth and movement, economic activities, space, land use and human settlement patterns of an area of the UK or the wider world.
Location	Locate hot and cold areas of the world in relation to the equator.	Locate the equator and the North and South Poles on a world map or globe.	Locate significant places using latitude and longitude.	Identify the location of the Tropics of Cancer and Capricorn on a world map.	Identify the location and explain the function of the Prime (or Greenwich) Meridian and different time zones (including day and night).	Identify the position and explain the significance of latitude, longitude, equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, the Arctic and Antarctic Circles, the Prime (or Greenwich) Meridian and time zones (including day and night).
Position	Use simple directional and positional language to give directions, describe the location of features and discuss where things are in relation to each other.	Use simple compass directions to describe the location of features or a route on a map.	Use the eight points of a compass to locate a geographical feature or place on a map.	Use the eight points of a compass, four and six-figure grid references, symbols and a key to locate and plot geographical places and features on a map.	Use compass points and grid references to interpret maps, including Ordnance Survey maps, with accuracy.	Use lines of longitude and latitude or grid references to find the position of different geographical areas and features.
Maps	Draw or read a simple picture map.	Draw or read a range of simple maps that use symbols and a key.	Use four-figure grid references to describe the location of objects and places on a simple map.	Use four or six-figure grid references and keys to describe the location of objects and places on a map.	Identify elevated areas, depressions and river basins on a relief map.	Use grid references, lines of latitude and longitude, contour lines and symbols in maps and on globes to understand and record the geography of an area.

Byfleet Primary School - Geography Skills Progression

Compare and contrast	Identify the similarities and differences between two places.	Describe and compare the human and physical similarities and differences between an area of the UK and a contrasting non-European country.	Classify, compare and contrast different types of geographical feature.	Describe and compare aspects of physical features.	Identify and describe the similarities and differences in physical and human geography between continents.	Describe the climatic similarities and differences between two regions.
Significant places	Name important buildings and places and explain their importance.	Name, locate and explain the significance of a place.	Name and locate significant volcanoes and plate boundaries and explain why they are important.	Name, locate and explain the importance of significant mountains or rivers.	Identify some of the problems of farming in a developing country and report on ways in which these can be supported.	Name, locate and explain the distribution of significant industrial regions around the world.
Geographical change	Describe how a place or geographical feature has changed over time.	Describe how an environment has or might change over time.	Describe how a significant geographical activity has changed a landscape in the short or long term. Describe the activity of plate tectonics and how this has changed the Earth's surface over time (continental drift).	Explain how the physical processes of a river, sea or ocean have changed a landscape over time.	Describe how the characteristic of a settlement changes as it gets bigger (settlement hierarchy).	Present a detailed account of how an industry, including tourism, has changed a place or landscape over time.
